Online Safety Training

...that fits your needs!

The Training Network has combined the power and reliability of our high quality training programs with the convenience and cost-effectiveness of Online Safety Training. Whether you need individualized, easy to administer training found in our Learning Management System, or simple access to streaming video, we can accommodate your needs. With over 450 full-length video courses and downloadable course materials, Training Network is the sole solution for all of your online training needs. Some of the many features of Online Training include:

- Interactive E-Learning Courses
- High Quality Streaming Video
- Administrative Tools
- Comprehensive Training Library
- Available 24 Hours/Day

Asbestos

Asbestos Awareness

12 min., 1996, Marcom

This video was created specifically to educate employees about the dangers of working with materials that may contain Asbestos. The Videotape provides the majority of the information needed to satisfy the training requirements for Class IV employees under the OSHA regulation 29 CFR 1910.1001. Affects many construction workers and maintenance personnel. Included on the DVD is a Leader's Guide, End of Course Quiz, Completion Certificate, and Attendance Log.

#0451, English or Spanish

DVD.....\$249.95

KIT.....\$349.95

Kit Includes: leader's guide, (30) employee handbooks, (5) posters, reproducible scheduling & attendance form, quiz, training certificate, log

Asbestos Awareness - Do Not Disturb

48 min., 2010, Environment--Media Inc

This updated program covers topics where training is required by EPA AHERA regulations and the OSHA Construction Industry Standard for Asbestos, and forms the core of the two hour asbestos awareness training requirement mandated by OSHA. It is ideal for custodians, maintenance workers, and others who might contact asbestos containing materials during the course of their work.

#2662, English

DVD.....\$299.95

Asbestos Awareness - Employee Basic Training

18 min., 2011, Training Network

Asbestos is a strong and incombustible fiber widely used in the past for asbestos cement piping, fireproofing and insulation. Employees are required to provide basic awareness training for employees who may have to work around asbestos containing materials. This program covers topics where training is required by various government safety regulations, and forms the core of the two hour asbestos awareness training requirement mandated by OSHA. It is ideal for custodians, maintenance workers, and others who might contact asbestos containing materials during the course of their work.

#2819, English or Spanish

Bloodborne Pathogens

Bloodborne Pathogens - Always Protect Yourself

16 min., 2009, Training Network

Designed to provide your employees with a straightforward look at how a Bloodborne Pathogen exposure affects many people, this video presents the circumstances of an exposure situation from three perspectives; the victim, the responder, and the co-worker. Each tells their story and how it relates to how your employees need to protect themselves any time they are potentially exposed to an incident involving blood.

#2560, English or Spanish

DVD.....\$399.95

Bloodborne Pathogens

Bloodborne Pathogens - Protect & Defend

12 min., 2010, Training Network

Bloodborne Pathogens are infectious materials found in blood and other bodily fluids that cause disease in humans. This training program will keep workers informed about situations where infections from blood and other body fluids are a risk factor. No matter the occupation the risk of encountering a bloodborne pathogen is present. Use this program to train your employees on the hazards of bloodborne pathogens and how to reduce the risk of exposure with this training program.

#2671, English

DVD.....\$299.95

Bloodborne Pathogens For Non-Healthcare Employees

12 min., 1996, Training Network

Helping an accident victim or providing CPR in an emergency could result in the transmission of bloodborne pathogens (BBP). Educate your employees how to reduce their risk of exposure to BBP. This video is designed for all employees, regardless of their job, to make them more aware of HIV and Hepatitis B viruses that can be transmitted through blood, body fluids, and contaminated blood products.

#0931, English or Spanish

DVD.....\$199.95

Bloodborne Pathogens Training for Employees

17 min., 2008, ERI Safety Videos

Many workers make the mistake of thinking that only healthcare providers are at risk from exposure to bloodborne pathogens, but almost all employees in the workforce can be exposed, often when they least expect it. To protect themselves from these microorganisms, employees must receive training and learn specific precautions, which is the purpose of this new program. Viewers will learn the hazards associated with bloodborne pathogens and how to protect themselves from exposure to these hazards by following universal precautions in each and every potential exposure situation.

#2524, English or Spanish

DVD.....\$499.95

Bloodborne Pathogens: Safety In The Workplace

23 min., 2015, JJ Keller

Bloodborne pathogens exposure can be a serious risk to all employees and one that companies cannot afford to take. This video trains employees (with or without occupational exposure) to recognize potential hazards and their own roles and responsibilities in safeguarding themselves at work. The DVD covers all of the critical aspects of bloodborne pathogens training.

Bloodborne Pathogens

To The Point About: Bloodborne Pathogens

12 min., 2014, *To The Point Communications*

Workplaces are full of hazards, hazards that can kill us. One such hazard is Bloodborne Pathogens. This program trains your employees on the dangers of Bloodborne Pathogens and how to control exposure that will prevent diseases and save lives. This program quickly gets to the point about the important topic of Bloodborne Pathogens and explains OSHA's required training points to your employees. This DVD contains both English and Spanish versions.

DVD.....**\$249.95**

Confined Spaces

Confined Space Entry: A Deadly Situation

20 min., 2015, *CLMI*

Working in spaces such as manholes, tanks, ducts and pits is just a part of the job for the workers in many industries. No matter how familiar employees may be with a space, there will always be risks. The hazards in a confined space can be deadly. However, careful planning, the right equipment and thorough training will decrease the hazards inside confined spaces. This DVD comes with an Attendance Log, Completion Certificate and Quiz.

#3253, English
DVD.....**\$449.95**

Confined Spaces - Permit Required

20 min., 2011, *Training Network*

Confined space operations require a balance of the proper equipment, awareness and knowledge of hazards, proper training, and common sense. No matter how you look at it, confined space entry is a complicated matter requiring specific procedures, so employees must always follow policies and procedures. This training program is designed to provide employees with the safety basics and necessary skills involved in confined space entry necessary to comply with 29 CFR 1910.146.

#2820, English or Spanish

Performing the Confined Space Assessment

10 min., 2013, *Training Network*

Confined spaces can be dangerous places to work, and improper entry or rescue procedures are responsible for a number of fatalities each year. OSHA Standard 1910.146 requires that you assess your facility to identify confined spaces, document the hazards they may present, determine which are permit required, and develop rescue procedures for each one. This program trains your employees on the proper steps to perform a facility wide confined space assessment.

#2968, English
DVD.....**\$299.95**

Confined Spaces

Survive Inside: Employee Safety In Confined Spaces

Concise Version Available, 2012, *ERI Safety Videos*

Confined spaces can be dangerous, but they don't have to be. No matter what role employees play in their organization's confined space entry program, they

must understand their responsibilities and have the knowledge and skills to perform them properly. This program explains why entering confined spaces can be so hazardous and how those hazards can be controlled by following proper confined space entry procedures. Viewers will also learn valuable lessons from a reenactment of a poorly-conducted confined space entry in which three lives are needlessly lost.

To The Point About: Confined Space Entry

12 min., 2015, *To The Point Communications*

Our workplace is full of hazards, hazards that can hurt us, or kill us. Controlling these hazards and preventing injuries is the point of our safety and health program. One such hazard is the conditions that exist inside confined spaces such as manholes, tanks, vessels, pits and similar areas. Controlling access to confined spaces and the hazards they contain can prevent injuries and save lives. That is the point of our facility's Confined Space Entry Program and that is the point of this program. Each DVD includes both an English and Spanish version, along with a Leader's Guide and End of Course Quiz.

#3236, English/Spanish
DVD.....**\$249.95**

Crane Safety

Crane Safety

18 min., 2010, *Marcom*

Crane-related accidents can often be deadly, due to the heavy loads that are lifted. Once a load or a crane itself falls, not much can be done to stop it, and there is little time for people to move safely out of the way. This training program points out to employees that over 90% of crane-related accidents are caused by human error... and that they are the key to preventing these incidents. Included on the DVD is a Leader's Guide, End of Course Quiz, Completion Certificate, and Attendance Log.

#2702, English or Spanish
DVD.....**\$249.95**

Crane Safety - The New Regulation

22 min., 2010, *Training Network*

Produced specifically to train your employees on changes arising from OSHA's new crane safety standard, this program addresses and outlines the changes in a clear, concise manner that is easy for employees to understand. Training your crane operators and other employees so they are knowledgeable about what training is required under the new regulation.

#2704, English
DVD.....**\$299.95**

Crane Safety

Crane Signal Person Basic Training

18 min., 2011, Aurora Pictures

 OSHA's revised crane standard includes a new training requirement for signal persons. Anyone who may signal a crane is now required to be qualified on the Standard Method for hand signals. Signal persons must know and understand the type of signals used and be tested as competent in their application of these signals. This program trains crane signal people and crane operators in the use of the 20 standardized hand signals as described in ASME B30.5 and OSHA 29 CFR 1926.

#2771, English
DVD.....\$449.95

Cranes, Chains, Slings & Hoists

12 min., 1999, Training Network

 Illustrates proper use of cranes and lifting devices while emphasizing safety. This program explains sling angles, safety techniques, and inspection procedures, and is designed for anyone operating jib hoists or cranes. Anyone operating this equipment must be trained; this program meets OSHA training requirements outlined in 1910.180.

#1025, English or Spanish
DVD.....\$199.95

Overhead Cranes - Safety Is In Your Hands

20 min., 2013, Safety Source

 Cranes. Useful tools. Powerful tools. Tools that need to be treated with respect. Why? The reason is simple. Any mistake with a crane, even a small mistake can have serious consequences including property damage, injury or even loss of life. Knowing how to use the equipment properly and following established policies and procedures can help minimize risk. This program trains your employees on the proper operating procedures when using overhead cranes in the workplace. It is a must see program for any new operator and great as refresher training for your more experienced employees.

#2979, English or Spanish
DVD.....\$199.95

Rigging Safety Basics

21 min., 2010, Marcom

When it comes to crane operations, rigging can often be the weak link that causes an accident. How a load is attached to a crane can make the difference between a successful lift and an unfortunate accident. And rigging-related accidents can often be deadly, due to the large and heavy loads that are lifted. Once a load or a crane itself falls not much can be done to stop it, and there is little time for people to move safely out of the way. This training program points out to employees that over 90% of rigging-related accidents are caused by human error... and that they are the key to preventing these incidents. Included on the DVD is a Leader's Guide, End of Course Quiz, Completion Certificate, and Attendance Log.

Crane Safety

Safe Use & Operation of Industrial Cranes

Concise Version Available, 2014, ERI Safety Videos

Cranes come in a wide variety of sizes, configurations and capacities to lift and transport various products and materials used in industry. Because of the serious hazards presented by crane operation, crane operators must be fully qualified and 100 percent committed to the safe operation of their crane. That is the purpose of this program—to review the safety rules, precautions and safe operating practices common to all cranes in order to help crane operators work safely with the specific cranes they operate.

Electrical Safety

Basic Electrical Safety

10 min., 2013, Training Network

This program, Basic Electrical Safety in the Workplace, trains employees to have a basic understanding of electricity and how it works. It covers the different types of electricity such as low voltage, high voltage, and static electricity, all with the purpose of training employees to be more aware of electrical safety. This video is perfect for non-electricians, including maintenance workers and machine operators, and anyone else who works with and around electrical tools and equipment.

#2966, English or Spanish
DVD.....\$299.95

Electrical Safety

17 min., 2011, Marcom

 This comprehensive program reminds employees about electrical hazards they may face in their jobs, and provides the information they need to work safely around electricity. This program will also assist in satisfying the OSHA training requirements under 29 CFR Part 1910.331 (Electrical Safety Standard) for "non-qualified" employees. Included on the DVD is a Leader's Guide, End of Course Quiz, Completion Certificate, and Attendance Log.

Kit Includes: leader's guide, (30) employee handbooks, (5) posters, reproducible scheduling & attendance form, quiz, training certificate, log

Electrical Safety - What Everyone Should Know

16 min., 2010, CLMI

Companies direct a lot of safety training towards electricians and other qualified workers, but what about the rest of us? Electricity is something that we use every day and are often not aware of or ignore its hazards. Statistics show that nearly 50% of company employees do not know the basics of electrical safety at work or at home. This program presents information on how electricity works, what it can do to the human body and how to use electricity safely. This information is presented at a level for everyone who works with electrically powered tools, equipment and appliances and presents what everyone should know to stay safe.

#2718, English or Spanish
DVD.....\$399.95

Electrical Safety

Electrical Safety Awareness For Non-Electricians
15 min., 2002, Aurora Pictures

This video is perfect for maintenance workers, machine operators, and anyone else who works with or around electrical tools and equipment. This program has a variety of settings with scenarios of electrical situations 'gone wrong'. Your workers will watch real life interviews with people who have experienced electrical mishaps and they will learn how to protect themselves!

Electrical Safety For Everyone

Concise Version Available, 2014, ERI Safety Videos

New Because electricity is so important to our everyday lives, it is surprising that many of us know very little about it or the hazards it presents. Many workers don't understand the dangers of electricity and don't follow safe work practices when working with or around electricity or electrical equipment. You don't have to be a qualified electrical worker or electrician to have a need to understand electrical safety. In fact, all workers should know and practice basic electrical safety. This program provides viewers with a general understanding of how electricity works while showing them the actions they can take to prevent becoming part of an energized electrical circuit.

Electrical Safety For Qualified Workers

Concise Version Available, 2014, ERI Safety Videos

New Electricity is a powerful force that can cause serious injury and death. When it comes to electrical job tasks, it only takes an instant to turn a momentary mistake into a fatality. This is why qualified electrical workers must understand the hazards presented by exposed energized parts and know how to protect themselves through the use of safe electrical work practices. This program explains the safety precautions these employees must always take to avoid needless tragedies while performing any type of electrical work.

Electrical Safety Illustrated

17 min., 2001, Training Network

Because it is so commonplace, electricity does not always get the respect it deserves regarding its hazards. This informative video will teach your employees how the currents of electricity flow through circuits and the body. It is great for both beginners and those employees who need retraining!
#1353, English or Spanish
 DVD.....**\$249.95**

Electrical Safety

Safe Electrical Work Practices & 2015 NFPA 70E
Concise Version Available, 2014, ERI Safety Videos

New Every year, electrical workers are seriously injured or killed by contacting energized parts or being subjected to an electrical arc flash. To prevent these types of incidents, these workers and the organizations for which they work must understand and follow up-to-date electrical safety-related electrical work practices, maintenance requirements and administrative controls. One of the leading authorities on electrical safety is the National Fire Protection Association, the NFPA. Their document number 70E is recognized by many regulatory authorities and organizations as the "best practices" for electrical safety. This program provides an overview of the 2015 edition of NFPA 70E and shows how following its guidelines helps keep electrical workers safe. The changes from the 2012 edition are also explained. Topics include approach boundaries, skills required of qualified electrical workers, selecting arc-rated clothing and protective equipment, arc flash PPE categories, creating an electrically safe working condition, when energized work is permitted and energized electrical work permits.

Emergency Preparedness

Active Shooter And Workplace Violence

10 min., 2014, ERI Safety Videos

New Emergencies involving violence are unfortunately a real possibility in today's workplace. This can also include encountering an active shooter on the premises. One of your job responsibilities is to be prepared and know how to respond should such an emergency occur at your workplace. Knowing the proper procedures to follow during an emergency could mean the difference between life and death. The purpose of this program is to familiarize you with basic response practices when encountering workplace violence, practices that will help you to be prepared for and to respond to a violent emergency.

Active Shooter: Helping Prevent Tragedy

9 min., 2013, Safety Source

BEST SELLER Active shooters seem to be all over the news these days. These acts of violence are becoming more commonplace in today's society, and although your chances of being a victim of an active shooter incident are miniscule, it is important your organization and your associates plan and be prepared for such an incident. Active shooters can strike where we live, where we work, where we study, where we shop or any other environment. No business or institution is immune to the potential of an active shooter attack. The purpose of this informational training is not to alarm viewers, but to enlighten them regarding some of the elements of an active shooter scenario and what they should do to be prepared to deal with such an act.

Housekeeping

Good Housekeeping: Everyone's Responsibility

Concise Version Available, 2013, ERI Safety Videos

Good housekeeping is everyone's responsibility. It doesn't matter what position you hold or what type of task you are performing; keeping your work area tidy and free of clutter should be every employee's obligation. It's part of your commitment to safety and your actions go a long way in showing your co-workers that you want everyone to go home safe at the end of each day. This program reviews basic housekeeping practices that can prevent workplace fires and discusses other hazards that could contribute to employee injuries, but can be controlled by good housekeeping.

Slips, Trips & Falls

Fall Factors: Understanding & Preventing Slips, Trips & Falls

Concise Version Available, 2012, ERI Safety Videos

 Slips, trips and falls result in more than 15 million workplace injuries each year; and unfortunately, injuries related to falls are the second leading cause of on-the-job fatalities. Falls are also the third leading cause of disability among employees. The good news is that these mishaps can be prevented. By understanding how "fall factors" such as balance, gravity, friction and momentum contribute to these incidents, we can take preventative measures to prevent falls. That's the purpose of this program - to prevent fall-related incidents by providing viewers with an understanding of the factors involved in every fall as well as the common hazards and unsafe actions that make a fall much more likely.

Compressed Air Safety

15 min., 2001, ERI Safety Videos

This video stresses the importance of working safely with compressed air to prevent injuries. Featured are four dramatic workplace incident re-enactments that illustrate the fact that compressed air hazards are often not easily recognized but still can have tragic consequences. Topics include the dangers of cleaning with compressed air, how compressed air can injure the human body, use of hearing protection in noisy environments, inspection and maintenance of compressed air equipment and components of compressed air systems. This program is a must-see for any employee using compressed air or even working in the area where compressed air is used.

Specific Chemicals & Gases

Hazardous Waste And Chemicals

12 min., 2001, Training Network

Each year, over 6,000 people are killed on the job and about 3.6 million receive disabling injuries, in the United States alone. This program teaches basic hazardous waste regulations, chemical labeling, working with hazardous materials, and working safely with solvents. This video is excellent for orientation and for updating experienced employees.

Hydrogen Sulfide Employee Training

Concise Version Available, 2010, ERI Safety Videos

Employees can work safely in areas where the potential of hydrogen sulfide exists by following their organization's Hydrogen Sulfide Contingency Plan, knowing how and when to use respiratory protection and knowing the meaning of their facility's hydrogen sulfide warning sounds and signals. This program reviews these three key issues and many other precautions that protect employees from H2S exposures when followed.

Propane Safety Update

10 min., 1999, Training Network

Propane has been a common fuel in homes and businesses since the early 1920s. Today, propane is used extensively in warehouses because propane's clean burning properties eliminate sludge, carbon, and gum deposits, resulting in lower maintenance and operation costs, as well as reducing harmful exhaust emissions. This video trains employees to safely use and handle liquefied petroleum gas, refilling tanks and cylinders, and wearing the proper personal protective equipment.

Specific Chemicals & Gases

Working Safely With Compressed Gas Cylinders

12 min., 1995, Marcom

In today's work environments, compressed gas is used for many things including refrigeration, welding, heating and a number of other functions. Compressed gas can be dangerous, and employees who work with them need to know how to handle them properly. This video provides the information employees need to handle and transport these potentially volatile storage containers.

HAZWOPER - Safety Data Sheets

15 min., 2014, Marcom

New Every chemical has different hazards. It is important that employees know how to protect themselves from these hazards, as well as what they should do in an emergency involving workplace chemicals. The answers to these and other important questions about hazardous chemicals can be found on the chemicals' Safety Data Sheets (SDS). The SDS is basically a guide for the safe use of a hazardous chemical. It provides information about handling, storing, transporting and working with the chemical safely. So it is important that employees who are responsible for HAZWOPER response know how the SDS is organized and where they can find important information on it. This video trains employees about the format of Safety Data Sheets and reviews how the information in an SDS can help them work safely with potentially hazardous chemicals.

PPE - Eye

Eye Safety - Basic Training

14 min., 2011, Training Network

 Eye injuries are 100% preventable yet over 90% of all eye injuries are due to the lack of or improper use of eye protection. Nature has tried to protect the eyes from injury by providing us with a number of built in devices however, these natural defenses protect the eyes from minor injuries and are not sufficient to protect our eyes from heavy exposures that exist in industry today. This program is designed to train your employees on the many ways eyes can be injured and how to select and use personal protective equipment to protect themselves from injury.

Eye Safety Update

15 min., 2007, Marcom

Most employees take 'healthy eyes' for granted. But our eyes are very fragile and statistics show that eye injuries occur frequently in the workplace. This updated training program shows employees that many eye problems are caused by not paying attention to the work that they are doing or not wearing appropriate PPE.

Protecting Our Sight

Concise Version Available, 2012, ERI Safety Videos

Each and every day, our eyes provide the gateway that allows us to recognize and comprehend the world we work, live and play in. Because our vision is so crucial to almost all aspects of our daily lives, it's difficult to understand why we wouldn't protect our eyes in every instance they are at risk from hazards; yet, over 2,000 workers in North America suffer some type of eye injury requiring medical treatment every day. This program discusses the protective devices and precautions we can utilize to prevent such injuries while stressing the importance of assessing the hazards of each job task and avoiding common pitfalls that often lead to these incidents.

Personal Protective Equipment: Your Final Defense

12 min., 2013, CLMI

Workplaces are expected to be safe and risk free. But sometimes there are hazards that sometimes can't be controlled. That's when you need to use Personal Protective Equipment or PPE. The personal part is important because PPE is specifically selected by employers to be worn by workers to protect them from the hazards of the job. Whether it is eyes, head, feet or hands, this DVD will educate your employees on the importance of PPE and how to select, use and maintain this important equipment. This program also comes with a leaders guide and PowerPoint presentation.

PPE - General

PPE - Your Last Layer of Protection

Concise Version Available, 2013, ERI Safety Videos

Most of us already know that personal protective equipment, or PPE, is required for the various jobs we perform and the many areas in the plant into which we enter. Yet, thousands of injuries occur each year to employees who are either not wearing any protective equipment at all, or are not wearing the appropriate protection for their job task or work environment. This program discusses the proper selection and use of common types of personal protective equipment and features worker testimonials that provide valuable lessons about the importance of wearing your PPE.

PPE: Wear It For You

12 min., 2011, Aurora Pictures

Personal protective equipment is designed to protect the wearer from injury, but it only works if you wear it. This is dramatically demonstrated in David Dyck's powerful, true story of surviving a violent explosion during a routine maintenance procedure. Because of the PPE he was wearing, he is here today to share his moving story. Not only does David remind us of the importance of PPE, his story illustrates how an injury affects family, friends and co-workers. It's a message your employees will not forget.

PPE - Hearing

Hearing Conservation - Are You Listening Jim?

14 min., 2011, CLMI

Hearing loss is irreversible, but can be prevented through knowledge of its causes and proper use of PPE. This program presents the story of one worker's struggle with his own "inner voices" that encourage him to take better care of his hearing. Your workers will understand that it is not just the noise at work that can cause hearing loss, but excessive sound levels off the job as well. The overall message is simple, hearing loss is permanent but preventable and everyone needs to take care of their hearing any time they are exposed to high levels of noise. Using high end graphic production techniques, creative dialog and compelling visuals, your employees will start "hearing voices" that encourage smart hearing protection choices.

#2770, English or Spanish

DVD.....\$399.95

Hearing Conservation - Basic Training

20 min., 2011, Training Network

Hearing loss is easy to ignore; there is no pain, pressure, or bleeding as hearing loss from noise exposure occurs. It happens gradually and often not noticed until it's too late. There are an estimated 33 million people in the U.S. with hearing loss enough to affect their daily activities. Occupation-related noise exposure accounts for 11 million cases of hearing loss and another 36 million people suffer from tinnitus, which is a chronic ringing in the ears. This program is designed to train your employees on the basic methods of protection themselves for work-related hearing loss.

DVD.....\$299.95

Hearing Conservation and You

Concise Version Available, 2015, ERI Safety Videos

This unique training program follows a group of co-workers as they receive their annual training on hearing conservation. It focuses on one employee, Steve, who does not take the issue of hearing loss seriously and continually disregards the need for hearing protection at home and at work. As time passes, Steve develops the symptoms of hearing loss due to his poor choices regarding hearing protection. Steve becomes convinced of the importance of protecting his hearing from further damage. Watching the example of his poor attitude and subsequent hearing loss will convince your employees to protect their hearing at home and at work. Viewers will be trained on the importance of the hearing conservation program.

Electrocution Hazards in Construction Environments

Part I - Types of Hazards & How to Protect Yourself
22 min., 2012, Marcom

Over the years, electrocution has become the fourth leading cause of death in the construction industry. Contrary to common perception, it does not take a great deal of electricity to cause an electrocution. Just the amount of current that it takes to light a common Christmas Tree bulb can stop the heart and result in death. There are a number of causes of shock, electrical burns, and electrocution, therefore employees need to know what hazards to watch out for and how they can protect themselves. The first in a two-part series on electrocution hazards, discusses the major types of electrocution hazards, and how employees can protect themselves from electrical hazards and electrocution in construction environments. This program comes with a Leader's Guide, End of Course Quiz, Attendance Log, & Completion Certificate.

Electrocution Hazards in Construction Environments
Part II - Employer Responsibility

15 min., 2012, Marcom

Construction sites can contain a number of potential electrical hazards. OSHA defines four types of hazards that are associated with electricity, and three types of injuries that result from them. Direct contact with electricity, through a power source, cord or transmission line is the most common type of electrical hazard, and can occur in a number of ways. Employers are required to train workers regarding electrocution hazards and the measures that they should take to control the hazards. Employers must also put procedures into place so that workers can get answers to any questions that they have about working safely around electrocution hazards. The second in a two-part series on electrocution hazards, this program discusses the major types of electrocution hazards, and how employees can protect themselves from electrical hazards and electrocution in construction environments, as well as employers' responsibilities in these areas. This program comes with a Leader's Guide, End of Course Quiz, Attendance Log, & Completion Certificate.

Hand & Power Tool Safety In Construction Environments

18 min., 2008, Marcom

Most people have injured themselves with a power tool at least once in their lives. In fact, learning to use some tools seems to "require" a little pain. But, tool accidents on the job also result in thousands of serious injuries and hundreds of deaths each year, most of which could have been avoided by simply handling tools safely. This program comes with a Leader's Guide, End of Course Quiz, Attendance Log, & Completion Certificate.

Hand Finger & Wrist Safety In Construction Environments

13 min., 2008, Marcom

Our hands, wrists and fingers are valuable tools-the most valuable we'll ever own. In fact, we use our hands so much that they are exposed to a multitude of hazards such as: machines with heavy or fast moving parts that can pinch or grab, sharp tools that can cut or puncture and corrosive materials that can damage the skin. This engaging video discusses workplace activities where hands, wrists & fingers can be subject to injury, and how to avoid hazards and protect the hand. This program comes with a Leader's Guide, End of Course Quiz, Attendance Log, & Completion Certificate.

Rigging Safety in Construction Environments

21 min., 2010, Marcom

When it comes to crane operations, rigging can often be the weak link that causes an accident. How a load is attached to a crane can make the difference between a successful lift and an unfortunate accident. And rigging-related accidents can often be deadly, due to the large and heavy loads that are lifted. Once a load or a crane itself falls not much can be done to stop it, and there is little time for people to move safely out of the way. This training program points out to employees that over 90% of rigging-related accidents are caused by human error... and that they are the key to preventing these incidents. This program comes with a Leader's Guide, End of Course Quiz, Attendance Log, & Completion Certificate.

Slips, Trips and Falls in Construction Environments

17 min., 2012, Marcom

Employees often do not give much thought to the prospect of slipping, tripping or even falling on the job. Yet these types of accidents account for more workplace injuries annually than any other accident category. Many of these injuries can be disabling, or even fatal. Because there is so much material, so many tools and pieces of equipment, and so much in the way of partially completed work, construction sites can be a virtual maze of slip, trip and fall hazards. This program trains your employees on the different types of situations found on construction sites that can lead to slips, trips and falls, and what they can do to avoid or prevent these accidents. This program comes with a Leader's Guide, End of Course Quiz, Attendance Log, & Completion Certificate.

Construction Safety Awareness

Safety Bob's Comprehensive Construction Safety Orientation

Concise Version Available, 2013, ERI Safety Videos

Construction work is very unsafe, as almost 1,000 employees are killed and thousands of others are hurt on building jobsites each year. While there have been many security improvements over the years to control the hazards that assist to these occurrences, new and inexperienced employees still get injured on the jobsite way too often. This program stresses the issue that these workers must be responsible for their own individual safety. Construction Safety Specialist Bob Synnnett discusses the hazards of construction work and what activities building employees can take to avoid mishaps on the job. Each DVD comes with a leader's guide, end of course quiz, & completion certificate.

Safety Orientation in Construction Environments

14 min., 2009, Marcom

If you look closely at your accident statistics, you will notice that the most likely people to get injured are employees who are new to the job. These new employees include more than your recent hires. Temporary employees, an employee transferred into a new work area, contract employees, a recently promoted employee, even a member of management temporarily filling in, are all really new to their jobs. Use this informative training video as part of your orientation process to address the most common safety problems construction employees will encounter on the job, and begin developing a good safety attitude in your employees from day one. This program comes with a Leader's Guide, End of Course Quiz, Attendance Log, & Completion Certificate.

Trenching & Shoring

The Competent Person & Soil Testing

20 min., 2011, Safety Source

While working in trenches and excavations, there is absolutely no room for risk-taking. Any condition you ignore or overlook can be fatal. Knowing proper soil classification techniques is vital to safe excavation operations. For each excavation soil testing must be completed by a competent person in order to determine what type shoring system is required to keep employees safe. This program trains your employees on how soil is tested and what the responsibilities of the competent person are.

Trenching & Shoring

Trenching & Excavation Safety: The Scott May Story
19 min., 2009, ERI Safety Videos

Trenching and excavation work—it's the starting point of most construction projects. Before you dig, there's a lot you need to know, because the risks, just like the weight of the soil, are too great to take a chance. This type of work is dangerous, with more than 100 workers killed in trench accidents each year. So if you work in a trench or excavation, no matter what your job, you need to know the safety requirements and that's the purpose of this program.

#2548, English

Work Zone Safety

Work Zone Traffic Control & Flagger Safety

16 min., 2011, Safety Source
Work zone traffic control is an important part of any well-planned construction or maintenance project. Traffic control is essential to protect both the public from the hazards associated with the project and the employees on the work project from the traffic and the flagger is the key individual charged with the responsibility of maintaining this control. The flagger must always remember that their job is the most important one on the crew, as the lives of all individuals in the work area and the safety of those driving through the work zone depends on you and your decisions.

Back Injury Prevention

PowerLift: Lifting Training That Works

Concise Version Available, 2009, ERI Safety Videos

Most of us have been trained to lift objects with the traditional bend your knees and keep your back straight technique, but it just doesn't work. This method forces us to overuse our knees and legs and our backs still end up bearing the brunt of the load. Dr. Michael Schaefer has recognized the flaws of the conventional lifting technique and developed a safe, easier and stronger lifting position: the powerlift. This technique keeps the back in a powerful and safe posture while an object is being lifted. This program explains the five lifting techniques that have been derived from the powerlift position so viewers can move materials safely in practically every situation.

Making It Fit: Improving Our Office Comfort

16 min., 2011, CLMI

BEST SELLER A desk, a chair, a phone, a monitor, a keyboard and a mouse are the standard working tools of millions of people. But these simple tools can take their toll when we don't fit the equipment to the physical needs of the office worker. This program covers ergonomics in the office environment and how to avoid the fatigue, strain and stress that can result from the poor office setup.

Movement And Stretching: Pre-shift Warm Up

13 min., 2013, Safety Source

Warming up properly for work and stretching throughout the work day has a positive impact, not only on the work day, but on each associate's life away from work. Who doesn't want that? Proper exercise can help prevent injuries before they occur. It doesn't take a lot of time and it really can make a difference. This video outlines several simple stretching exercises that anyone, regardless of age, job description or physical condition, can perform safely and easily.

Ergonomics

Office Ergonomics

12 min., 2015, Marcom

One size does not fit all, and sometimes that's a real pain. The places where we work and the things we work with (our desks, chairs, computers, and other tools that we use) do not fit everyone equally. For many of us efficiency, comfort and safety in the office can often be hard to come by. However, it can be done using ergonomics! This training program addresses how to recognize ergonomic problems, the potential for adverse effects if our offices are not set up ergonomically, and practical solutions employees themselves can use to do that. Also included on this DVD is a Leader's Guide, End of Course Quiz, Completion Certificate, and Attendance Log.

Out Of The Office: Ergonomics For The Mobile Worker

16 min., 2011, CLMI

When we work in a typical office, we have the advantage of ergonomically adjustable office equipment and furniture. But when we rely on laptops, tablets and smart phones in settings that range from coffee shops to hotel rooms to our kitchen table, we need to be aware of what we can do to create our own comfortable work environment. This program discusses posture and how it impacts the proper use of mobile office equipment, the special challenges it presents and the importance of positioning and moving our bodies as we work.

Understanding & Controlling Ergonomic Risk Factors

Concise Version Available, 2015, ERI Safety Videos

Ergonomics can be complicated, but this program provides a simple explanation all employees can understand.

Ergonomic controls are used in almost all workplaces to prevent musculoskeletal disorders (MSDs), often called cumulative trauma disorders or repetitive stress injuries. Workers often ignore the signs and symptoms of these disorders until a chronic condition has developed. The purpose of this program is to explain ergonomics and to train your organization to take control of ergonomic risk factors. The program reviews work control practices that employees can follow to prevent musculoskeletal injuries and illnesses. It also features both office and industrial settings to illustrate important lessons about ergonomics. This training program comes with a Leader's Guide, End of Course Quiz, & Completion Certificate

Move It Safely: Avoiding Injury While Moving Materials

Concise Version Available, 2013, ERI Safety Videos

 A few of the main causes of injuries to material handling workers are showing off to their co-workers and not wanting to take time to get the proper equipment or ask for help. This leads to workers struggling to lift and carry materials which are too heavy and should not be carried alone. In order to move objects safely, employees must be well trained in safe material handling techniques while also maintaining the proper attitude and state of mind to use their training each time they lift or move an object. This program discusses the techniques, precautions and safe work practices you can follow so that when an object must be moved, you are able to "move it safely."

Warehouse Safety

Reach Truck Safety
15 min., 2011, Safety Source

 Reach trucks, also known as narrow aisle trucks, are designed to operate in warehouses with narrow aisles. These trucks have some characteristics in common with standard sit down forklifts, but also have some unique features that need to be taken into account in order to operate safely. These useful, powerful, and critical pieces of equipment can also be dangerous when operated in an unsafe manner. Operators must have a good safety attitude and commitment to responsible operation to prevent injuries and property damage. This program discusses common hazards reach truck operators may encounter and trains them on how to control those hazards through safe operating techniques.

DVD.....\$299.95

Walkie-Stacker Safety

14 min., 2012, Safety Source

 A walkie-stacker is different than any other type of equipment your employees use, particularly the way it handles and its center of gravity. In many ways it works like a forklift, but in respects it is totally different in its operation. The walkie-stacker model forklift is designed for a person to operate the truck while walking, not riding the equipment. Unlike the rider forklifts or counterbalanced equipment that is designed for heavier loads, the walkie-stackers are designed for less demanding loads and shorter travel distances. This training program trains your employees in the characteristics and safe operation of walkie-stackers.

Workplace Violence

Workplace Violence - Prevention & Intervention
20 min., 2011, Training Network

 Workplace safety is a major concern to employers and employees alike. Whether the threat of violence comes from employees within the company or from external sources, it is critical that your employees are trained in how to recognize the potential for violence and how to respond if threatened. Prevention is critical and early intervention helps prevent more serious acts. This program is designed to train your employees on how to recognize the potential for danger and how to respond appropriately.

Choices - Driving Safely
25 min., 2014, Safety Source

 Over 30,000 people lose their lives each year in traffic accidents. Why? Because somewhere along the way a person made a wrong choice. Whether it was reading a text, driving while impaired, or simply not paying attention, the choice made led to an accident. With driving such a large part of many employee's job duties, it is important that you train them on how the choices they make can have a significant impact on both themselves and the company. This compelling program covers many of the situations employees may find themselves in while driving a vehicle, and trains in ways they can deal with those situations and avoid accidents.

Driving Safety (Cars & Light Trucks)

Defensive Driving Techniques - Your Ticket to Safety
20 min., 2011, Safety Source

Motor vehicles traffic crashes are the leading cause of unintentional injury death in the U.S., and the leading cause of death for American workers. Each year, car crashes cause over 40,000 deaths, more than 250,000 injuries requiring hospitalization and more than three million visits to emergency rooms across the nation. For employers, this equates to serious injury or death of employees, as well as substantial direct and indirect costs. Most motor vehicle crashes can be avoided if drivers and passengers take simple steps to reduce the likelihood of a crash and increase the chances of surviving a crash. This video program is designed to train your employees in basic defensive driving techniques they can practice each time they get behind the wheel, whether for business or personal reasons.

Driving Safety (Cars & Light Trucks)

Distracted Driving: Making the Correct Choice

12 min., 2012, Safety Source

 In today's busy world, distractions are everywhere, especially behind the wheel. Phones, iPods, texting, talking, directions from a GPS, they are all distractions. The temptation to use these devices behind the wheel is very real. This program identifies these hazards, exposes the dangers they present and offers practical advice on how to remain focused behind the wheel. Statistics show that up to 63% of all motor vehicle crashes are due in whole, or in part to distracted driving. In fact, distracted driving is rapidly becoming the largest contributor to serious and fatal vehicle crashes. This program will help prevent you and your employees from becoming one of these statistics.

Driving Safety

20 min., 2011, Marcom

 Young or old... experienced veteran or novice... driving is the great equalizer. Once we get behind the wheel and enter our nation's roadways we're all subject to the same road conditions. Most of us travel the roads every day... in cars, vans or trucks... often on company business. And each year, traffic accidents claim over 40,000 lives and cause more than two million serious injuries. In fact, motor vehicle crashes are the number one cause of death on the job. This driving safety program covers all the essentials for safe driving and includes sections on distracted driving and road rage. Your employees will be reminded of the hazards of using cell phones and texting while driving, and the restrictions that many states have begun placing on these activities. Included on the DVD is a Leader's Guide, End of Course Quiz, Completion Certificate, and Attendance Log.

Driving Safety (Cars & Light Trucks)

Street Racing: The Fatal Truth

10 min., 2014, Safety Source

New In all seriousness, illegal street racing is a real problem in today's world. It has become an epidemic. Consequences include legal action, such as tickets or jail time, and for some, death. It is extremely important that your employees are informed of the high chance of losing control of your vehicle in a race. What happens to the families and children that are in the wrong place at the wrong time during a crash? How could anyone bear the thought of a decision - harmless as it may seem - that caused physical harm to innocent bystanders? There is one way to guarantee this will never happen to your employees: inform them of the dangers of street racing. It's not worth it.

I Chose To Look The Other Way: Three Stories of Workplace Safety

13 min., 2015, ERI Safety Videos

In this dramatic telling of the popular "I Chose To Look The Other

Way," viewers will witness examples of three common scenarios of workers not speaking up about safety. The storylines feature a failure to follow lockout/tagout, an employee neglecting to wear PPE and a worker choosing not to wear fall protection as the primary causes of incidents that result in fatalities; however, your employees will learn that the root cause of each was a reluctance to speak up. They will be convinced that speaking up about unsafe acts is critical in the prevention of workplace injuries. Some of the other safety concerns addressed in the program include supervisors, rushing, habits, shift work and intimidation.

Just A Second Ago: The Brad Livingston Story

21 min., 2009, ERI Safety Videos

When Brad Livingston decided to violate procedures, participate in a shortcut and condone the unsafe actions of a co-worker, his world was literally blown apart in a matter of seconds. As Brad was engulfed in flames, he fully expected to die, but thoughts of his three young daughters inspired him to fight for his life. In this motivational presentation, Brad humbly points out how his choices and decisions that day contributed to the death of a co-worker, life-changing injuries to himself and unimaginable grief and trauma to his family.

Safety Awareness & Attitudes

OSHA Top 10 Violations

27 min., 2015, Safety Source

New Year after year, thousands of employees and contractors are injured or killed while on the job. Often these types of incidents are called accidents and chalked up to just bad luck or being in the wrong place at the wrong time. Injury statistics, however, show that the same types of incidents continue to occur over and over again. This training program serves as a guide to help your employees understand the ten most common OSHA violations, and what both the company and its employees can do to help avoid these type incidents and minimize the risk of an OSHA citation. It comes with both an English and a Spanish version on one DVD.

Responsibility - Stay in Control of Your Safety

9 min., 2015, Aurora Pictures

New Your employees don't come to work planning on being injured or even working unsafely. Yet every day, hundreds of workers are injured and killed on the job. This is often the result of them forgetting they are responsible for their safety and taking shortcuts or using other unsafe practices they know they should not do. In other words, they gave up control of their safety. This compelling safety video shows how workers need to prevent outside forces like time, emotions, peer pressure or distractions from taking control of their safety.

DVD.....\$299.95

Safety Decision-Making: Overcoming Human Nature

19 min., 2012, ERI Safety Videos

BEST SELLER Many people assume that workers will choose to work safely simply because they don't want to get hurt. Unfortunately, our decision-making process isn't that simple. This program, hosted by safety professional Tom Harvey, uses common examples, reenactments and a little humor to explain how humans are tempted to make unsafe choices by succumbing to the instant gratification of shortcuts, risk-taking and peer pressure. This program explains how our safety decision-making process works and provides tips and techniques we can use to overcome our human nature and make safe choices rather than unsafe ones.

Safety Awareness & Attitudes

Safety's Top 10

19 min., 2010, ERI Safety Videos

BEST SELLER While the top 10 lists you see in magazines and on late night talk shows are created to get laughs, the list in this program focuses on a subject that is no laughing matter - causes of workplace injuries. With disturbing regularity, thousands of employees and contractors are injured or killed while on the job each year. Some people make the mistake of calling these types of incidents "accidents" and chalk them up to just "bad luck" or just being "in the wrong place at the wrong time, but safety professionals know better. Injury statistics show that the same types of incidents continue to occur over and over again. Viewers will see the top 10 causes of these incidents listed from 10 to one, but more importantly, they will learn how workplace injuries can be prevented.

Job Safety Analysis: Safety Awareness and You

Concise Version Available, 2013, ERI Safety Videos

BEST SELLER There are multiple methods used to protect workers from injury and each method shares a common root. The basic fundamentals of all injury prevention methods are an understanding & awareness of the hazards to which a worker may be exposed to. The company and the worker must be aware of a hazard before it can be controlled. This program discusses the important roles played by both management and employees in recognizing, analyzing, and controlling workplace hazards. It will also show how this shared duty of job safety analysis, safety awareness and hazard recognition helps prevent injury. Within this video it will show you is the process of developing a successful job safety analysis.

Safety Leadership

Job Safety Analysis

10 min., 2015, Training Network

New Job Safety Analysis (JSA) is proactive assessment tool used by companies to review job methods and uncover hazards. Its purpose is to identify, analyze, and record the steps involved in performing a specific job, the existing or potential safety and health hazards associated with each step, and to recommend actions to eliminate or reduce the hazard. This program trains your employees on the proper method of conducting a Job Safety Analysis.

The OSHA Answer Book 12th Edition

2014, Mark Moran

BEST SELLER When was the last time you sat down with the OSHA Code of Federal Regulations (CFR) and tried to make sense of it all? Chances are you wished someone else would read it for you and explain, in the simplest terms possible, just what it all means. That's exactly what Mark Moran has done in this publication, The OSHA Answer Book. The book has sold over 150,000 copies and is now in its 12th edition, and the need for simple explanations of OSHA regulations is no less today than it was 43 year ago, when the OSH Act was created by Congress. The OSHA Answer Book is written in plain, easy-to-understand language. Not government gobbledygook. It covers every OSHA Standard a business person would need to know in order to comply with the OSHA regulations covering General Industry, 29 CFR 1910.

Safety Leadership

When OSHA Calls

2011, Mark Moran

An OSHA Inspector is at your Door. Are You Prepared? Thousands of OSHA inspectors are employed by both Federal & State governments. Their inspections have led to millions of OSHA citations against employers. OSHA compliance officers visit over 92,000 workplaces each year and if they show up at your workplace, it is important that you know what to expect and what your rights are. This comprehensive book provides you with a step-by-step guide for what to do during an OSHA Inspection. Filled with time-proven advice and real-world examples, this book explains how companies are chosen for inspection, whether or not to permit warrantless inspections, and what your rights are during an OSHA Inspection. It outlines what inspectors look for during an inspection, what documents they will ask to see, what to say and not say to an inspector, and how to reduce fines for violations and extend the time provided for abatement. When OSHA Calls will help you understand your rights and how to respond if you are faced with an OSHA Inspection.

Take Safety Home: Preventing Off-The-Job Injuries

Concise Version Available, 2009, ERI Safety Videos

 After working 25 years as a firefighter and paramedic, Martin Lesperance has treated thousands of injuries and medical emergencies. As a former EMT, Martin knows that the majority of injuries occur off the job and conducted this presentation in front of a live audience to encourage all workers to "take safety home." In this video Martin recalls many true stories of off-job incidents resulting in injuries and deaths to illustrate the importance of such critical safety issues as thinking about the repercussions of your actions, heeding warning signs and labels, the importance of PPE off the job, and preventing motor vehicle collisions and house fires.
